## 30 Day Public Notice Report

---

The Department of Natural Resources is providing this report to satisfy the requirements of the "Procedures Concerning Certain Licenses Act", IC 14-11-4, and its associated administrative rule, 312 IAC 2-3. The application files are available for public inspection at the Division of Water's office in Indianapolis. Please contact the Division's Technical Services Section at (317) 232-4160 or the toll free number 1-877-928-3755 to make an appointment for file review. Photocopies may be made for a nominal charge of \$0.10 per 8 1/2 " X 11" copy.

A pre-action public hearing on an application may be requested by filing a written petition with the Director, Division of Water:

Michael W. Neyer, P.E., Director  
Division of Water  
Room W264  
402 West Washington Street  
Indianapolis, Indiana 46204

For a petition to be considered valid it must:

1. Contain the typed or legibly printed name and complete mailing address of each petitioner;
2. Be signed by a minimum of 25 individuals who are at least 18 years old and either reside in the county where the project will take place or own real property within 1 mile of the project site;
3. Affirm that each signatory to the petition satisfies the requirements of item 2; and
4. Identify the application for which the public hearing is being requested either by the application # or the applicant's name and the project description.

A petition which does not meet these requirements will be considered invalid and the hearing request will not be granted.

A person may request that the Department provide written notice of its action on an application by filing a written request with:

Division of Water  
Room W264  
402 West Washington Street  
Indianapolis, Indiana 46204

The request must identify the application by either the application # or the applicant's name and the project description.

Application # : FW-23539

Stream : Kirkendall Creek

Applicant : City of Noblesville  
Kevin A Jump  
City Hall  
16 South 10th Street  
Noblesville, IN 46060

Description : Two new bridges will be constructed in association with Noble West Subdivision, one will carry Edenshall Lane and the other will be a pedestrian bridge connecting a walking trail. The first structure will be a two-span timber bridge with span lengths of 26' and 26'. The structure will have an out-to-out length of 53'-3.8" and a clear roadway width of 31'. The spill through abutments will have 2:1 sideslopes armored with riprap placed over geotextiles. The abutments will be skewed 15 degrees to align with streamflow. The approach roads will be elevated a maximum of 5.8' above the existing grade. A 6' wide sidewalk will be constructed on the north side of the structure and a 10' wide sidewalk will be constructed on the south side. The second structure will be a single-span timber bridge with a span length of 25'. The structure will have an out-to-out length of 11' and a clear travel way width of 10'. The spill through abutments will have 2:1 sideslopes armored with riprap placed over geotextiles. The abutments will not be skewed and will be square with the channel. The pedestrian approaches will follow the existing grade. Also, several areas will be cut and filled to create a park along the west bank between the proposed structures. Park construction activities within the floodway will consist of one (1) 160' x 360' football field, a portion of a 450' x 64' paved parking lot, and a paved walkway that will be constructed at grade. The proposed park area will require 0.04 acres of wetlands to be completely filled in. Details of the project are contained in information and plans received at the Division of Water on September 19, 2005.

Location : Beginning approximately 1000' upstream of the East 146th Street stream crossing, continuing along the west bank to approximately 1200'

Application # : FW-23542

Stream : Ohio River

Applicant : Consolidated Grain and Barge Company  
Terry Ham  
210 George Street  
Aurora, IN 47001-1401

Description : Approximately 425' along the grain loading dock will be dredged to remove sediment buildup. The dredged area will be approximately 25' wide to an average depth of 3' to 5'. A hydraulic excavator located on the riverbank will perform the dredging. The excavated material will be loaded onto dump trucks to be transported to an upland drying/storage site on the facility property located landward of the floodway. The excavated material will be allowed to dewater before it is disposed of by sale as fill material or to a landfill located landward of the floodway. Excavating a small depression and using the excavated materials to form a 3' high berm around the depression will construct the dewatering basin. Details of the project are contained in information and plans received at the Division of Water on September 22, 2005.

Location : Along the right (west) bank, beginning approximately 900' upstream of the confluence of Hogan Creek and continuing upstream approximately 440'
